COTTON MARKETS

Better Weather and Spread of Reaction Idea Help Bears. New York May Topples.

were dull and inactive and varns irregular and weak.

Opening on this side was at a lower revel, with the new months off most. July started 25 points off, at 38.50c, which was high for the day, and at its lowest the price was 37.55c, recovering to 38.10c and closing a few points under that. October started at 35.25c, went to 35.60c, and then sold off to 34.50c, recovering to 34.95c. Sentiment has been shaken, but there is still confidence among the bulls because of crop conditions.

In the spot markets business continued small and quottions were unchanged to 80 points off at leading centers, except the revision in Memphis. Sales were 696 bales in New Orleans, 65 in Houston, 238 in Dallas, 655 in Little Rock and 118 in Augusta. Locally sales for the day were 750 bales, making 8,700 for the week. Unsold stock here was cut to 215,000 bales, compared with 132,000 a year ago and 132,000 in 1918. Linters in stock are 20,000 bales, against 57,000 last year and 152,000 two years ago.

The weekly statistics were slightly The weekly statistics were slightly

bearish, but received scant attention

Memphis cotton was revised, reduced from 600 to 50 points, middling and be-low; above middling unchanged. Mid-dling 40.50c. Sales 750 bales. Week's sales \$,700 bales.

NEW YORK COTTON.

NEW YORK May 21.—The cotton market showed renewed nervousness during today's early trading. The opening was barely steady at an advance of 5 points on May and that position sold 30 points net higher right after the call, touching 42.75c on further covering. Trading in the current May delivery ended at noon, however, and the market paid little attention to the early fluctuations. Other months opened at a decline of 22 to 47 points with July selling at 38.35c and October at 35.30c, under liquidation due to another favorable weather map or continued nervousness over general trade conditions. Wall street, Liverpool and local traders were sellers, but there was considerable buying for spot house or trade account and prices showed rallies of several points later in the morning.

The news of the May break brought in more comprission house liquidation during the early afternoon, and there

to 25 points of last night's closing figures, but in the morning the market was unsettled by a spectacular break in the price of May contracts. Some notices were reported in circulation and the people who are credited with hav-

ing taken up notices earlier in the month turned sellers, sending the price down to \$8.80c, or nearly four cents per pound from the high level of the morning, and 265 points net lower. The last sale was at this figure, but the effect on later months was more sentimental than otherwise the market was fairly steady at net declines of some 20 or 40 points early in the noon hour.

eBars had more success in the market today than for some time, although they did not retain all of it. The chief influence seemed the spread of the idea that deflation is really under way and that cotton cannot escape soaring therein. The fast also that the weather conditions in the belt are more favorable contributed to the shakeout. A spectacular feature was the drop in May contracts New York from an early high at 42.75c to 38.80c, at which price the option expired. It was said that one reason for the violence of the break was the notices for delivery of about 2.000 bales a little while before the dead line. It did not have appreciable effect on the general list, which was weak for other reasons. Finals were steady and from \$5 to 73 points net lower, while New Orleans	Open, High, Low, Today, Pre- Jan.	NEW YORK, May 21.—Announcement that the government had virtually resumed control of the railroads as an emergency measure to relieve abnormal freight conditions, was received today with approval in financial circles. This was not reflected in the movement of prices at the opening of the stock market, however, further substantial reactions occurring in shippings, steel and food shares. Attantic Guif, Crucible Steel and the active sugar issues lost one to almost three points, Gains of one to two points were made by General Electric, American Locomotive and Colorado Fuel. Studebaker, American Can and low-priced oils eased in the final hour, but Mexican oils, rails and steels responded to further buying. The closing was firm.
Another unusual feature in the mar- lect locally was the radical revision in quotations, discounts on the low grades being reduced as much as son extra	Selling became general on the fairly favorable weather forecast for the cot- ton region, heavy liquidation was forced on the long side and prices broke until late in the morning they stood 43 to 54 points under the close	Range of prices on the New York stock exchange, with previous closing bids, furnished by Shepard & Giuck, Falls building.

U. S. Will Develop Mississippi River Trade With Added Craft If New York Barge Canal Is Discontinued.

Canal Is Discontinued.

W. M. POPE.

Special Correspondent The News
Scimitar.

WASHINGTON. May 21.—Thore is a possibility that 23 steel, concrete and wooden barges, now being used by the New York barge canal will be moved to the Mississippi and Warrior river trade under government operation. These barges would supplement those now in the trade on the Mississippi between upper river points, Memphis and lower Mississippi river points.

Gen. F. T. Hines, chief transportation service war department made a strong plea for retention for government operation of New York barge canal before the committee on Interstate Commerce of the house Thursday, refuting arguments put forward by E. S. Walsh, superintendent of public works of the state of New York and Henry W. Hill, representing the Buffalo chamber of commerce. Gen. Hines did not complete his testimony, due to adjournment until Saturday morning, when the hearing will be resumed.

Should the state of New York no longer desire operations of the canal and congress concurs, General Hines asked that the war department be permitted to transfer the entire equipment consisting of §3 steel, concrete and wooden barges and steamers to operations on the Mississippi and Warrior rivers. Fallure of the government to operate the canal at a profit thus far, he charged, was due to lack of co-operation on part of the people of New York an attitude not encountered with respect to operations on the Mississippi and Warrior He cautioned the committee of the great danger threatened to development of inland waterways through abandonment by the government of waterways to private Individuals who, he said, would be put out of business by the same agencies as have heretofore hampered the development of waterways.

A. A. AFTER GAMBLERS.

continued nervousness over general trade conditions. Wall street, Liverpool and local traders were sellers, but there was considerable buying for spot house or trade account and prices showed tallies of several points later in the morning.

The news of the May break brought in more comprission house liquidation during the early afternoon, and there was a further sharp decline in prices with July selling off to \$7.55c and October to \$4.50c, or about 120 to 125 points net lower.

The opening declines were followed by the rallies during the middle of the morning when a somewhat more cheerful view of general conditions speared to be developing and there was some buying for trade account as well as scattered covering. July sold up to \$8.50c and October to \$8.50c, within 15 to 25 points of last night's closing fig.

LITTLE ROCK, Ark., May 21.—Mobile base runners took full advantage of Little Rock misplays and won the opening game of the series, 2 to 1. Lukonovic pitched splendid ball and was given perfect support. Yellow Horse and Masters were the victims of ragges playing behind them. Yellow Horse retired in the fifth inning because of a sore arm.

General Selling in Corn Sends Price Downward, Helped by Curtailed Credits.

CHICAGO, May 21—General selling forced the corn market sharply down-ward today. Orders for unified railroad operations counted in a decided manner against the bulls, and so, too, did the widespread notice of merchandise price cotting and of moves to curtial banking credit. Opening quantations which ranged from 1₂0 to 4 lower, with July \$1.69 to \$1.79% and September, \$1.59 to \$1.59%, were followed by mislerate further setbacks. In some cases and then a little raily. Onto december of the selling pressure. After opening light to \$1.60% to \$1.70% the market underswent a slight further sag. Provisions were weakened by the break in grain values.

EFFECT ON ALL BONDS

GIRL FOOLS BANDITS.

CHICAGO. May 21.—Twelve-year-old Annie Coutoumanes wasn't fooled a bit when, on entering a drug store three bandits told her "the druggist wasn't in." She ran out and called the police, despite-the terrifying revolvers she saw in the bandits' hands, but the robbers escaped before the bluecoats arrived.

A Big Profit Maker

Farmers, Gardeners, Country Clubs and owners of large estates find in this wonderful power driven cultivator a machine that enables them to reduce their labor costs to a minimum. Probably no invention in recent years enables truck gardeners to increase their profits like the efficient, practical

The U. S. Marine Corps Turns Out "Two-Fisted" Chaps Who Can Use Their Heads; Gives Plenty of Travel, Adventure and Excitement.

Corporal, what are your ribbons for? Tell me what each of 'em means. One I got in the Spanish War, And one in the Philippines. One I got in the Boxer brush For makin' the Chinks be good. And one for helpin' to block the Boche

In bloody old Belleau Wood. orporal, if I should join your corps,
O what would it do for me?

ou'd learn "to range this wide world o'er" By sky and by earth and seabe at home in lands that lie Where the East and West

Worlds meet: o front the best man, eye to eye, and stand on your own two feet, Corporal, tell me, straight, what

kind Of a man the Marine Corps makes? he sort of chap you're glad to find At your side when a rough house breaks---

The sort of a chap who can crack a joke And laugh when the sky looks The kind who'll share his last lone smoke

Or give you the shirt off his back. Have you ever seen a Marine winging by, and envised him his arefree gir, the breaith of the snowlers and the depth of the shoulders and the depth of the chest under his well-fitting uni-form? Is it any wonder the sirls tuve a soft spot in their hearts for these soldlers of the sea."

That Marine didn't just happen to be the husky lad he is. He is merely a walking example of what the Marine Corps can do for the ordinarily healthy man. Maybe when he came into the service be was a little stoop shouldered.
didn't have much "pep." Maybe
he was working at a job he didn't
are for didn't have anybody to
pal around with."

The Marine Corps is a body of ien, carefully trained to use both unds, both feet and their heads They are the sort of men who can take Vera Cruz or form a guard of honor for the Prince of Wales, and o both jobs shipshape. They are lood brothers to the French For-ign Legion, the Pennsylvania State Constabulary, the Canadian Mounted Police and the Texas

angers. They are princes of good

cilows, and they're wildcats when

hey're riled.

No man does his best work unless he likes his job. And no man can do good work without plenty of recreation. It is upon these two principles that Marino Corps

training is based.

The Marine must be something of a sailor and everything of a sol-dier. So he is always learning cler. So he is always learning something new and intensely interesting. In addition to taking on quite a bit of seamanship, he learns to hike like an infantryman, ride like a cavelryman and handle guns like an artilleryman. He knows something of wireless telegraphy and mechanics.

In fact, when he comes out of the Marine Corps there are all sorts of big-paying civilian jobs that are waiting for a man who can do so many different kinds of things and do them well.

To keep a man fit there is nothing like athletic sports, and all

Marines are encouraged to go in for boxing, football, baseball and awimming. Competent coaches and trainers are provided and every fa-cility for a man to indulge in the form of sport that most appeals to

Good Fellowship of the Corps

A life of travel, adventure and outdoor work would naturally st-tract the man who has the makings of a "good fellow" in him. And nowhere do you find more "good fellows" than in the Marine Corps. If ever you have seen a bunch of Marines in their off hours in barracks, or out for a time in any of our large cities, or sightaceing in foreign ports, there is no need to tell you anything about that side of a Marine's exist-

And as for his chances of seeing And as for his charters of sceing the world—there is hardly a coun-try on earth where Marines are not stationed at present. They are in Haitl and the Philippines. They are in London, Paris and in China.
No big warship sets sail for foreign ports without a detachment
of Marines aboard.

Any healthy foung man who would like to learn a well-paying trade, and at the same time build bimself up physically and see the world, should investigate the U. S. Marine Corps. Don't hesitate to call at the Marine Recruiting Of-fice. You will not be urged to enlist, but you WILL be told THE TRUTH about the service. Send

for booklet. U. S. Marine Corns Recruiting Office Odd Fellows' Building, Memphis.
